

Information Sheet

Ghostwood is the original, revolutionary new, green product that uses primarily spruce, pine & fir, dead standing timber from beetle kill and wildfires to produce a truly unique alternative for reclaimed wood projects. With a proprietary multi-step process, this new certified, kiln dried wood has the natural appeal, character and appearance of true reclaimed wood and is intended as a great alternative, and affordable economical choice. Ghostwood provides the look, feel and rustic elegance without the hassle and trimming of conventional reclaimed wood.

By cutting to exact specifications they ensure minimal waste when the product is installed. Any scrap wood that comes from manufacturing the product is repurposed for animal bedding and compost. They use trees which have been harmed or killed by the mountain pine beetle, which if left standing increase the risk of wildfire and often go unused due to discoloration caused by the insect.

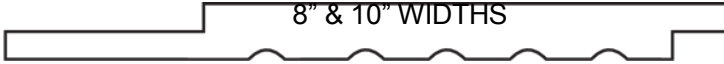

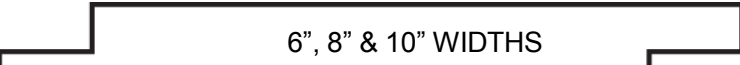

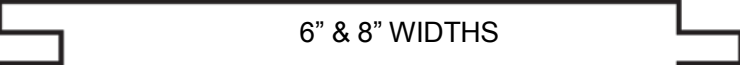

GhostWOOD®

Price List

Silver City & Bannack Brown

*Available in Circle Sawn & Weathered Only on SP "Spruce / Pine" & Fir. Priced Per. Linear foot
